BST Deletion.

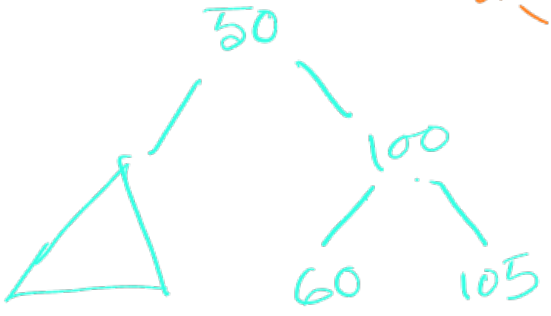

Successor → next greater element.
Can't have left child.

MVC pattern.

Give Quran a fair Chance.
Box of happiness.

z → node to be deleted

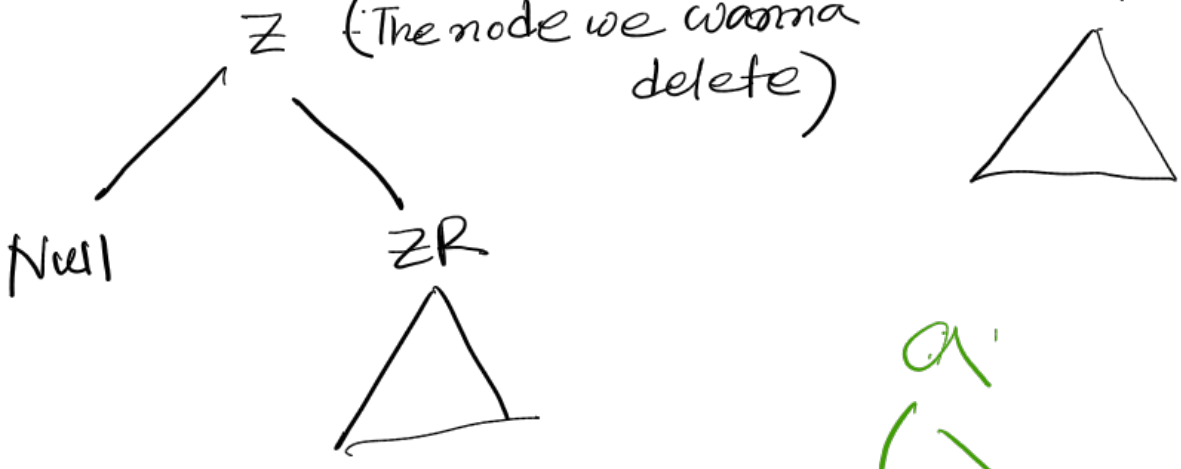

75 left
so 60 orphaned
will go to 100

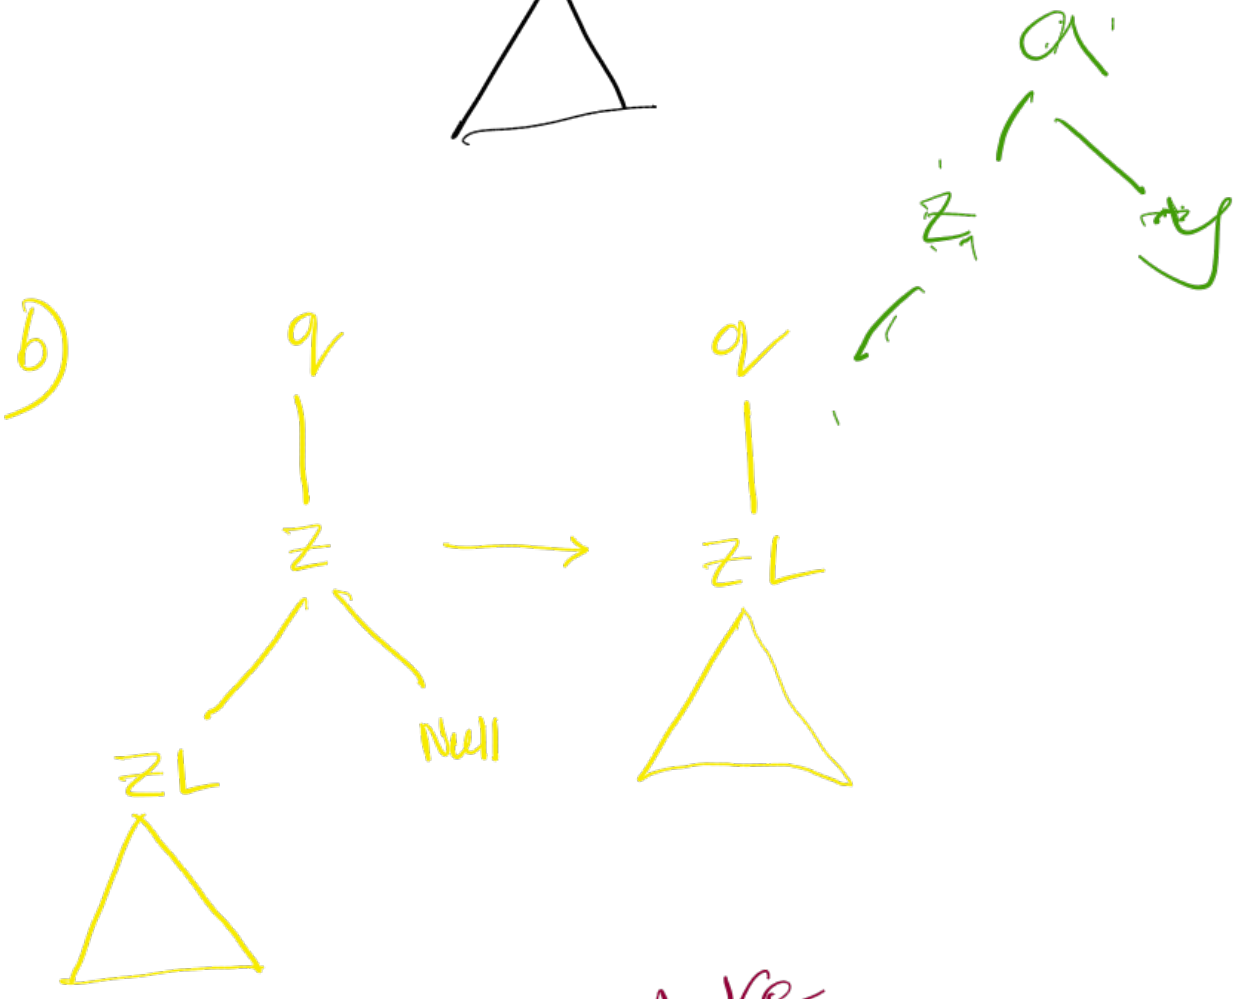

need somebody who doesn't have a left child cz everyone on right is bigger than him.

(minimum of right sub-tree (successor)

Case a

handshake

Transplant(u, v)

↳ v will be connected with u.p(arent)

{ if (u.p == NULL) root = v, v.p = u.p

return.

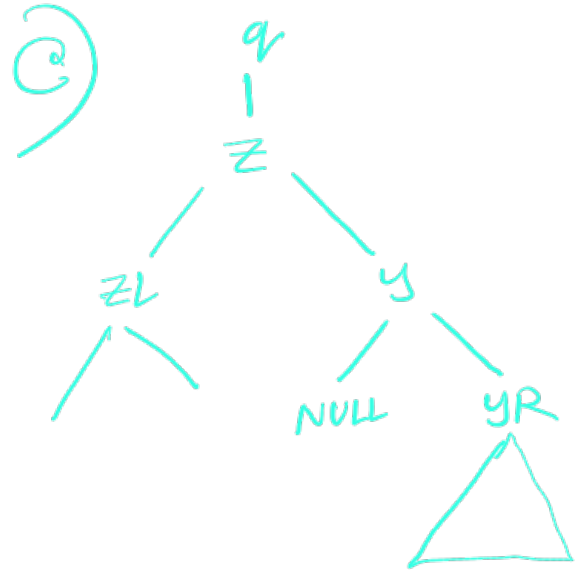

if (u == u.p.left)

u.p.left = v

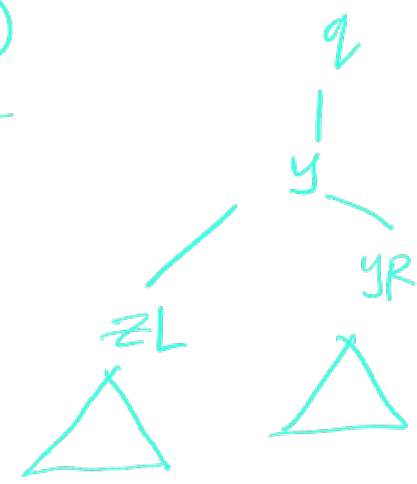

else u.p.right = v

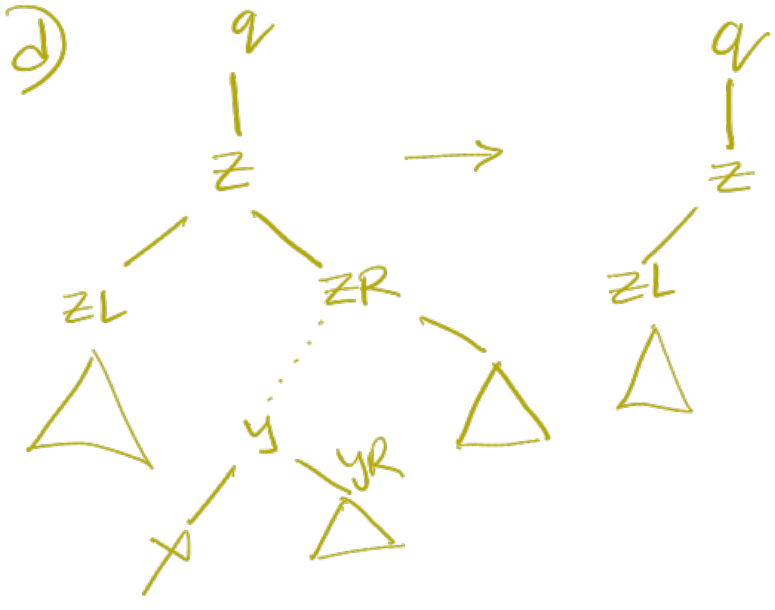

v.p = u.p

transplant(z, zL)

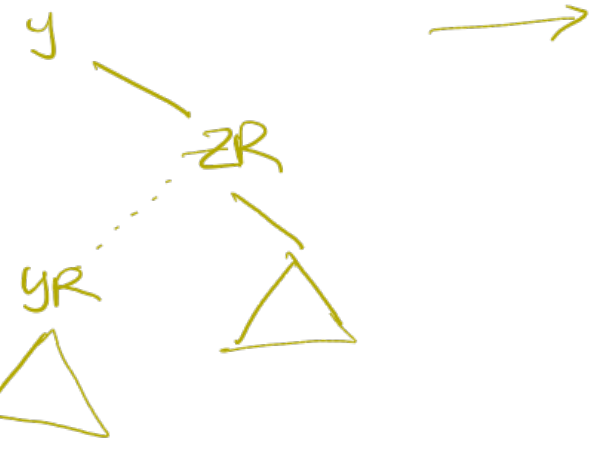

y = successor(z)
transplant(z, y)
→ y.left = z.left
z.left.p = y

yright catching
z right

z.left should go to left of succesor

go to parents left.

transplant(y, yR)

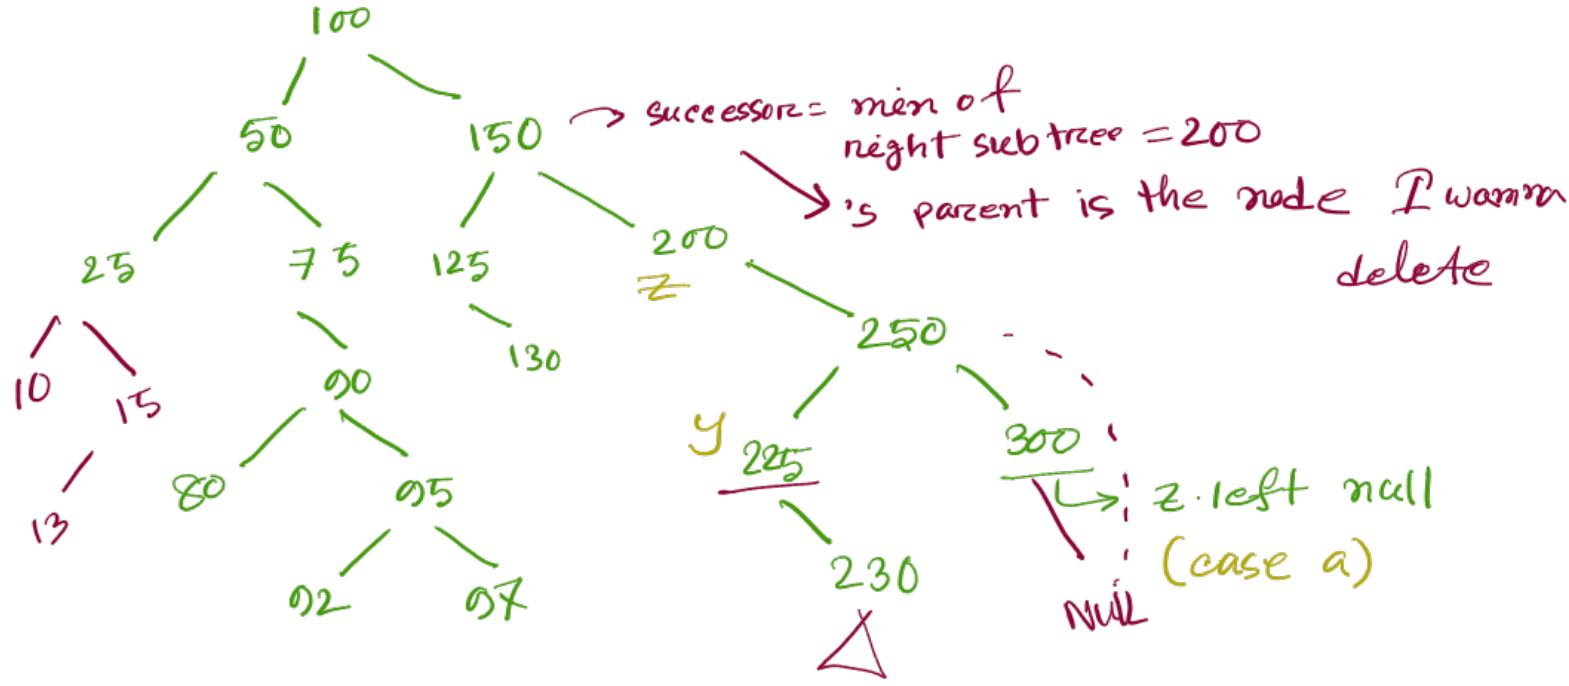

y.R = z.R

z.R.P = y

transplant(z, y)

y.L = z.L

z.L.P = y
