

Sequentially, 1 at a time

→ the program i named process/ job.

identity changed.

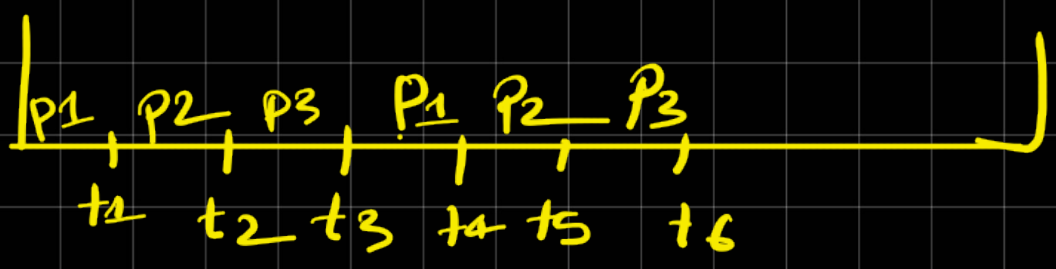

alive state code.

4 a single process → 5 states.

new
ready
running
waiting.
exit.

} Life cycle of a process.

Timeout → Round Robin Fashion.
↓
Time Sharing.

OS will maintain Profile for each proces
→ process controlled Block (PCB)

↳ This way processor could know from which instr. to start again.
