Date & Time

To date function → convert a string to Date datatype.

signature → data type : Large object Type:

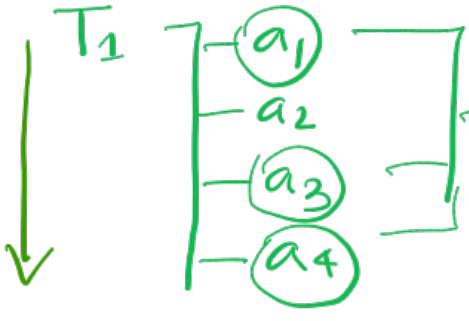

↳ Audio/Video file

2 type → binary & characters

Query returns pointer rather than large obj.

↳ special programming environment.

Create table extensions:

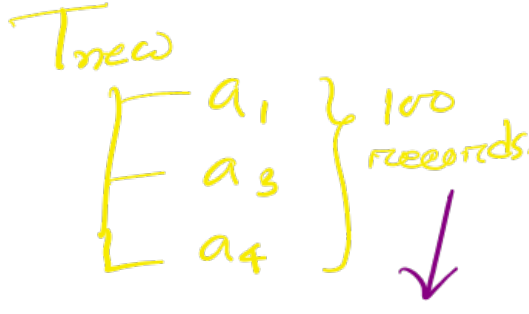

→ only need so → Create table as.

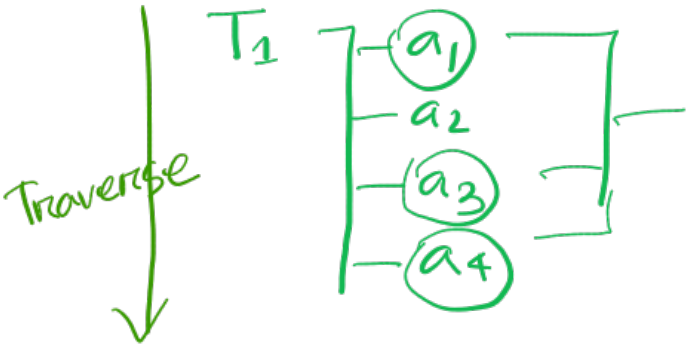

Create Table Tnew

As select a_1, a_3, a_4

from T_1

copy but not transfer.

SI →

S2 →

start until it mentions

smth false like 9 > 20;

→ DB user (owner of all object) → created all obj.

RPS → username

T_1 T_2 T_3 ---- T_n

P_1 P_2 ---- P_m

} objects of the system.

Modular Programming environment.

codes.

get result (ID) → method/func

return number;

always return 4
why?

C Teacher

↓

update records of own course.

Register

↓

Same as stdnt + fix names etc.

Students

↓

read only of few

} security vulnerable so 3 user will distribute who will do what.

Mechanism: Role

↓

package - set of privileges

Roles are recursive - can be accessed using other..?

DML →

U, I, D, S

↓ update ↓ Insert → delete → search

EXECUTE

Select * FROM T; → Fully Qualified Name

user@object

RPS@ students.

Ch-5 after 5.

Next ch-6 (Most imp)

↳ Design (2 weeks)

Mid → 1, 2, 3, 4, 6

Final → 5, 6 - - - - -
