1a)

1b) (iii) => group by

2 tier Advantage → updating is nightmarish.

(3) self reference.

patient & Doctors

Many to many → not considering at a time. Cardinality ⇒ Whole spectrum.

Ch-5 => Advanced SQL.

Obj creation in Java.

C++ ⇒ = new Myclass();

JDBC, PL/SQL, Basics

Assignment → replicate with C++/C#/Python.

Java in 3 min:

↓

Popular for UI.

```
public static void main(
```

```
Welcome1 = new welcome1();
~~obj~~ main();
```

welcom2 → welcome3 ... recursion X

solves ↗ static → allow to call any method/ without creating obj?
